

SIMPLY CORDLESS CELLULAR SHADE SPECIFICATION

Distributor	HT Window Fashions City of Industry, California USA
Headrail	The cordless cellular shade headrail is made of PVC. The dimensions of the headrail are 1-1/4" high by 1-3/4" deep. The total depth with the installation bracket is 2-1/4". The headrail end caps are made of PVC.
Bottom Rail	The standard bottom rail is made of PVC. The dimensions of the bottom rail are 3/4" high by 1-3/4" deep. The bottom rail end caps are made of PVC.
Fabric	The cellular shade is made of the spun lace, non-woven fabric, and is 100% polyester. The fabrics are available in the single cell light filtering and single cell blackout.
Cordless Module	The Simply cordless module is constructed with the PVC body. The lift cord is wrapped inside the module. The steel spring provides tension to pull the shade up.
Handle	The cordless handle is made of 100% PVC.
Installation Bracket	The bracket is constructed of the cold rolled steel and zinc plated. The hex head screws are included.
Fire Safety	The regular cellular shade fabric is not fire retardant. The fire retardant fabric is available upon request in both light filtering and blackout.
