How to add on or make changes to an order

In the event that you wish to add to your original order, it is possible, as long as the order is still in production. You will be required to submit changes in writing and must be signed by a person of authority indicating the items you wish to add or change. No verbal requests can be made. You will need to refer to the original P.O. number and indicate clearly the additions or changes you're requesting. Note: because add-ons may affect production time, check with customer service for any possible delays.

How to cancel an order

Cancellations or changes require an immediate response and can only take place up until the start of fabrication. You must first identify your P.O. number or side mark and then state the cancellation or change. Cancellations must be faxed or emailed in writing only, phone calls are not permitted. If an order has already been cut, a minimum charge of 50% will apply.

Should you order for the same room at different times?

This is a frequently asked question and should be addressed and explained at the point of sale. Under normal circumstances blinds, shades and verticals should be ordered for the same room at one time to prevent color deviations, as a result of dye and paint color variations from original lot to the other. If additional blinds, shades or verticals are ordered at a later time for the same room there can be a distinct color difference from the existing product to the new product. Also, window coverings that have been previously installed can have shade differentiations from newer products due to the progress of aging.

Questions concerning an order

Once you contact customer service you must have your P.O. number and/or side mark available.

How to Measure

Inside mount

A. Measure the window opening at three different places and use the narrowest dimension when ordering. Be exact! The factory will make the blind slightly narrower, so it won't rub against the window casing. (See A inside mount).

B. Measure the height of the window from the top (soffit) down to the sill. NOTE: The finished blind length may have a tolerance of based on product.

Based on product, CACO will automatically make a deduction on width for measurements submitted as inside mount.

Outside mount

Measure exact width and height of the area to be covered. It is recommended that blinds overlap the window opening by at least 1 1/2" on each side to insure privacy and control sunlight. (See A outside mount). When installation is designed for "no sill," allow the blind to overlap the bottom of the window casing by at least 1 1/2". Blinds will be made to exact measurements given. NOTE: The finished blind length may have a tolerance of based on product.

CACO will not make any deductions for measurements submitted as outside mount.

Designer Natural Woven Wood Shades

Special Notes and Ordering Instructions

Material and Characteristics

- Designer Natural Shades are an aesthetic collection of natural woods, bamboos, jutes, grasses and reeds harvested from nature.
- Each season's harvests are a celebration of unique textures, colors and striations that develop in nature.
- Natural materials are subject to variances in color, grain, texture and warpage that are inherent qualities in all-natural fibers.
- These variances are not manufacturing defects. The beauty of Designer Natural Shades lies in the distinctive irregularities of the slats and reeds.

Color Variations

- Even though rigid quality standards are maintained, the factory cannot guarantee exact color matches in each of the collections.
- Variations in color are natural and will be especially visible in lighter colored fibers.
- Variations in color will occur and are not manufacturing defects.
- Over time, the color of Designer Natural Shades will soften in the sun, exposing the beauty in mild tones.
- To avoid color variations that may occur between dye lots, it is highly recommended that multiple shade orders of the same pattern be placed at one time. This will lower the possibility of color variation due to different paints and stains.
- CACO is not responsible for variances in color for orders of the same pattern ordered at different times.
- Availability of colors is subject to change without notice.

Stretching, Shrinking, Cracks

- Woven wood fabric can be affected by temperature and humidity changes, which can shrink the material.
- Shipping and handling may also cause a slight change in shade lengths.
- Note: Material stretching or shrinking may become more noticeable on inside mount shades where exact lengths are more critical.
- Bamboo matchsticks tend to stretch after installation.
- Finished edges of bamboo and large reeds may crack after cutting and assembly due to the inherent property of natural materials.
- Finished shade height may vary in exact dimension falls in the middle of a wide slat.
- Finished shade height may have a tolerance of + or - 1"
